The dissertation "Achievement In Mathematics and Metacognition: A Correlational Study" would have never seen the light of the day without the guidance, assistance and patches of my guide Dr.K.B. Rathji. I record my deepest sense of gratitude and thankfulness to him for having guided and encouraged me at each and every steps of this arduous task.

I am extremely grateful to Prof.C.H.K.Misra, (Retd.) Principal and Prof.A.C.Banerjee, Principal, R.I.E. Ajmer, Head of Department of Education and Dean of Instruction Prof.M.A.Khaderji and all other faculty members of Regional Institute of Education, Ajmer for their kind help and encouragement from time to time.

I owe a debt thanks to the all the Principals/ Headmasters/Headmistresses and Mathematics teachers of various schools and students for their cooperation during the period of data collection.

Above all I express my sincere thanks to my respected parents, dear Buaji and other family members for their moral support and enlightenment which was the constant source of inspiration to me through out the study. Thanks are due to my dear classmate Mr.Anil Kumar Pachauriji and my sweet heart Miss Gagan Kulshretha for this constant encouragement through out the session 1994-95.

Finally, I also extend my thanks to typist Mr.Gyan Singh who worked with care and sincerity.

A.P.Saxena
